SHARKSKIN CHILLPROOF

Chillproof is an aquatic specific, windchill proof, 3-layer composite material with the thermal properties of a 2.5 to 3mm neoprene wetsuit that has been developed for watersports enthusiasts.

The comfortable 'hollow fibre fleece' layer is next to the skin and 'wicks' moisture and sweat away from the body to help keep you dry. The second middle 'technical' layer is 100% windproof yet breathes to regulate body temperature while stopping windchill. The third outer layer is a nylon/lycra blend for abrasion resistance and 4 way stretch. It is also UV resistant for sun protection and has a durable water repellent finish (DWR) to provide a protective shell that 'sheds' water.

Sharkskin Chillproof is neutrally buoyant, anti-microbial, odour resistant, itch resistant and machine washable.

CHILLPROOF LONG SLEEVE

By itself or underneath a wetsuit this top provides the ultimate protection from cold and wind. It has a soft neoprene neck seal to help keep wind, water, spray and waves from entering. The long sleeves offer additional protection from the cold and sun and the thumb tabs assist when pulling a wetsuit on over the top.

MENS AND WOMENS CUT

CHILLPROOF SLEEVELESS VEST

Designed for watersports enthusiasts who demand maximum manoeuvrability without sacrificing comfort and warmth. Large arm sockets and a low-cut neckline protect the body's core while allowing maximum mobility for strenuous exercise. By itself, under a wetsuit, or with a Rapid Dry as a second layer, this vest gets the job done.

Junior Sizes - 4, 6, 8, 10, 12 Available Now!		

CHILLPROOF SLEEVELESS VEST WITH HOOD

More than 25% of body heat is lost through the head and extremities of the body. The vest with hood design provides the best insulation and protection for colder dives when worn under a wetsuit. Keeps the head, ears & torso warm in a comfortable one piece design. Allows for easy equalisation and limited audible restriction compared to neoprene.

SHARKSKIN RAPID DRY

Rapid Dry is a lightweight, fast drying fabric in which the unwoven yarn is infused with a water repellent treatment (WRT). This method achieves a finish that is vastly more effective at shedding water and lasts much longer than traditional fabric treatments. The Rapid Dry fabric is warmer than cotton and nylon/lycra synthetic fabrics when wet. It has an SPF50+ rating for full sun protection, is lightweight, breathable and durable.

RAPID DRY LONG SLEEVE

The long sleeve Rapid Dry top is cut in a stylish loose T-shirt design making it comfortable for everyday use as well as on the water. The loose fit also allows you to layer it over other Sharkskin tops for extra insulation and sun protection when needed.

SHARKSKIN PERFORMANCE WEAR

The Performance range has been created with the help of competition athletes. The designs use Chillproof material for full protection from the elements, flexible compression material to allow for maximum manoeuvrability during intense sport and neoprene for stretch and comfort. The different designs use heavy-duty zippers to control heat retention and mesh panels for ventilation to allow for maximum performance as weather conditions change or as your heart rate climbs.

PERFORMANCE WEAR LONG SLEEVE

This top uses Chillproof material to keep your torso and rear kidney area protected. It also uses a breathable compression fabric in the shoulders and arms to aid in endurance and muscle recovery. The compression fabric is SPF50+, so provides protection for your arms and shoulders from the sun.

SHARKSKIN COVERT

The Covert range utilises the patented built-in concealment technology of HECS StealthScreen to improve your dive experience. The different designs use materials woven with HECS' conductive carbon fibers that trap and mask your naturally occurring electric signal output that many marine animals can detect and react to, enhancing your ability to get closer to marine life underwater.

Sharkskin Covert works by combining 3 scientific principles:

1. All living things emit a faint electric signal.
2. Some marine species can detect faint electric signals.
3. A conductive screen operating as a 'Faraday' shield can block electric signals.

COVERT STINGER SUIT

The 1 piece Fullsuit design featuring HECS StealthScreen technology masks the body's electric signal. Front entry zip makes it easy to get on and off, while the 2-way zip design adds a convenience feature for men. Wear under a drysuit, under a wetsuit or by itself in warmer waters for protection from marine stingers. SPF 50+ for added sun protection.

UNISEX FIT

		RRP
SSCVSU	COVERT STINGER SUIT	295.00

COVERT CHILLPROOF 1 PIECE SUIT

This 1 piece, back zip design suit has HECS StealthScreen technology inbuilt with the addition of Chillproof 'micro fleece' material for extra warmth. Designed to provide full body protection from the cold, sun and marine stingers. It can be used under an existing wetsuit for extra warmth or can completely replace your wetsuit in warmer waters. It is neutrally buoyant so you need less weight, making you more comfortable when snorkeling or diving.
